

Subject: Spouse Professional Gear in Counseling Module

Effective on 10 May 2011 the following interim solution is to be used in Counseling for PCS moves:

If Spouse Professional (Pro) Gear does not apply to the service member's move, enter a value of 0 (Zero) into the data field for Spouse Pro Gear Weight.

DPS is currently not correctly processing requests in which a blank value or no value is entered in the Spouse Pro Gear Weight field. It must have a weight or a 0 (Zero) to process properly.
